

# **VAN RIJN**

PROCESSING MACHINERY

## **PACKING AND DOSING...**

SINCE 1963

# PACKING & DOSING

Van Rijn has developed a wide range of machines for filling and sealing of various buckets and cans. Our installations are custom-made, using standard modules and parts.

**Stand-alone lid pressing roller**  
Wide range adjustable lid pressing roller on a conveyor belt to close the bucket with the lid.

**Seal machine**  
Our seal machine on conveyor belt, equipped with dosing-cylinder and position plate. As an option, we can also protect your product by gas filling.

**Dosing valve**  
Dosing valve with full and/or fine settings, developed using the latest technologies and can be supplied with an ATEX EX certificate. Because of its modular structure, the discharge can easily be adjusted to suit the product properties.

**Bucket denester**  
Wide range adjustable bucket denester.

**Filling unit**  
Weighing unit with display and dosing valve. Suitable for certified weighing.

### Dosingunit

A standalone dosingunit on conveyor, equipped with weighing system, dosing membrane valve and lid pressing roller.

### Bucket filling line

Assembled of various modules.

### Foil sealing machine

This machine seals and trims foil on a bucket. And is equipped with an electrical height adjustment.

### Lid denester

Automatically closes packaging with lids of various sizes. Available with an electrical adjustable magazine.

### Lid pressing roller

Wide range adjustable lid pressing roller to close the bucket with the lid.

## SERVICE AND MAINTENANCE

Our well-trained service engineers are available to service and maintain your machines and can handle problems quickly and effectively. The service department can be contacted via telephone number +31 (0)71 - 40 20 700 or [info@vanrijn.com](mailto:info@vanrijn.com).

## ABOUT US

**Van Rijn Processing Machinery, your partner in well-designed installations and effective solutions!**

We stand for reliable, custom-built machines of solid quality, with outstanding service.

Since 1963, Van Rijn Processing Machinery has evolved into a specialist supplier of complete processing lines as well as separate modules and parts.

Our special advantage is that we personally design, build and install the machines, using the best materials and latest technologies. Our goal is to provide you with a thoroughly reliable and cost-efficient production process.

We look forward to meeting you to further discuss the products and our services.
